

DRILL STRIKES BIG PAY SAND

Root, Hupp & Duff Prepare To Drill In The Pay Well.

Eastland, Texas, Oct. 11.—Root, Hupp & Duff have struck oil in their pay well and are preparing to drill it in. This well is situated in the southeast corner of the C. U. Colwell tract, six miles north of Eastland. The operators had looked upon this well for some time as a hopeless enterprise because at a depth of 1800 feet and no other showing was made off a derrick other showing was made until the well struck the big pay at a depth of 2843 feet.

The Root, Hupp & Duff well is located on the southeast corner of the C. U. Colwell tract, six miles north of Eastland, is making 25,000 barrels of oil from the upper pay. The operators are sure of larger production from the lower pay, which they believe has more than 20 feet farther down.

Five miles north of Eastland in the Root-Telling syndicate's A. C. Bond well a 100 barrel flow has been encountered. This flow will be cased off and drilling toward the deeper pay will be resumed.

Three miles northwest of Eastland the Caldwell Oil company's test on the Simer farm made two flows by heads Sunday after being given a quarter shut at 2440 feet. The well will be plugged back to the 2400 level and given another shot. A showing of both oil and gas was found at the 2400 foot level. The total depth of this well is 2888 feet. There are 477 drilling operations under way outside of those in the Desdemona district. Of this number 134 are drilling below 2000 feet, rapidly approaching the completion depth; 172 are drilling below 2000 feet, and the rest are in various stages of completion.

WELL COMES IN AS GASSER
BUT IS NOW PRODUCING
The Lucky Whiting Oil company's No. 1 Lewis well, in the Desdemona, Texas, field, which came in some time ago as a dry gasser, is now producing 500 barrels a day.

Oil Men Refuse Offer To Have Stock Examined

Table Resolution Providing Examination of Company Holdings.

A committee to pass on the acreage and capitalization of oil companies and associations before each stockholder shall be offered for sale by brokers in El Paso is apparently not wanted here. At a meeting of brokers and others at the Central Stock and Oil exchange on North Oregon street Thursday night such a proposition was introduced by tabling a resolution introduced by Dr. J. M. Robertson.

The meeting had been called for the purpose of adopting some method of preventing the sale of stocks of oil companies or other concerns in the El Paso market. Auctioneer Bill Rodgers called the meeting to order. Tom H. Johnson was made chairman and H. H. Major, secretary. Dr. Robertson introduced a resolution to the effect that "El Paso stockholders should deal only in the stocks of companies which had been passed upon by a committee of brokers such committee to look into the affairs of such corporations or associations as to their legitimacy. The resolution also provided that companies desiring to sell their stocks should be required to pay a reasonable fee for such examination."

Dr. Robertson and W. L. Barnard took issue of the plan of the resolution. The former argued that dealing in stocks on the exchange was legitimate business and not gambling. Mr. Barnard took the opposite view, said he had been a member of the New York curb and New America stock exchange and that any one who entered the game of dealing in stocks did so to gamble.

J. H. McCutcheon said he thought the law already furnished sufficient protection to the public and moved the table of Dr. Robertson's resolution. The motion was carried and the meeting adjourned.

MARIE ELIZABETH WELLS
IS MAKING 1000 BARRELS
Wichita Falls, Texas, Oct. 11.—The Marie Elizabeth Wells oil company's No. 1 in block 21, Burdick tract, northwest extension, is flowing at the rate of 1000 barrels daily. The flow is steadily increasing.

Five wells in block 27, Waggoner pool, have caught fire in the last few days. The fire at two of the wells was extinguished before much damage was done. Considerable damage was caused by the fire at the other three wells.

CONFIDENCE IN OIL AT PECOS

J. O. McFadin Says People Enthusiastic—His Company Ready To Drill.

J. O. McFadin, president of the Texas-American Oil & Refining company, has returned from Pecos, where he has been for the past few days completing arrangements for drilling in the well this company is drilling near Monahan, in Ward county. Mr. McFadin came back more enthusiastic than ever over the prospects of getting oil in the Pecos valley.

"All the big companies are gathering up as much acreage as possible, and are just as confident as the small operators, that within a few months this will become one of the most important producing fields in the state," he said.

Some 25 companies are now drilling in this district and he believes the first well should be in shortly. The Texas-American Oil & Refining company is located on a perfect dome very similar to the country surrounding the Texas Oil tract in Burdick tract, he said. The derrick is shown in the picture above.

Good Showings Of Oil Found In Shallow Test

Further Indications Develop in the San Angelo Townsite.

San Angelo, Texas, Oct. 11.—At 27 and 70 feet oil showings have been found in the shallow test being sunk by 20 local men on West Randolph street in San Angelo. Drilling has been stopped while the six and four-inch casing is being set. The well will be drilled to 500 or 1000 feet if necessary. This test is being drilled on the property on which a water well showed oil several years ago.

The Texas Petroleum syndicate has closed down its well on the Harris brothers' ranch, Coke county, at a depth of 1600 feet because of the lack of sufficient flow.

Drilling has been resumed on the San Diego and Texas Oil company's well of the W. J. Clegg ranch near Carlsbad. It was necessary to stop drilling for a short time when there was a break in the lighting system.

HUECO BASIN OIL WELL IS DOWN TO 300 FEET

Sept. W. D. Chappin, of the Hueco Basin Oil company drilling operations, arrived in El Paso Saturday morning with a log of the well up to 1230 feet this morning. At that time the well was down 290 feet. The log since that published in The Herald is as follows: 110 to 170 feet—Blue shale with hard limestone streaks. 170 to 185 feet—Hard blue limestone. 185 to 208 feet—Strata of hard gray and blue limestone. 208 to 215 feet—Very soft light gray limestone. 215 to 225 feet—Hard gray limestone streaked with sand. 225 to 235 feet—Hard gray limestone streaked with soft gray limestone. 235 to 245 feet—Very soft light gray limestone. 245 to 250 feet—Soft light brown limestone. 250 to 260 feet—Hard dark brown limestone. 260 to 270 feet—Blue shale streaked with hard blue limestone. 270 to 280 feet—Very soft light gray limestone.

SQUEAKS.
“A whole lot of talk dat goes round,” said Uncle Eben, “an no real help in movin’ forward dat de squeak is an axp.”—Washington Star.

Four Companies File Charters In New Mexico

Incorporation Papers Filed With the State Corporation Commission.

San Antonio, N. M., Oct. 11.—Four oil companies today filed their charters with the state corporation commission. The Tularosa Valley Oil and Gas company, of Alamogordo, is incorporated for \$200,000, of which one fourth is subscribed by the following incorporators, all of Alamogordo: J. H. Vandervoort, G. V. Clayton, W. V. Clayton. The Petroleum Exploration company of Port Sumner, is incorporated for \$200,000, all of which has been subscribed by the five incorporators, who are as follows: W. E. Bartlett, H. Miller, Sam J. Nicol of Port Sumner; John T. Holman of Portales, and W. E. Mann of Spokane. Bartlett and Holman have subscribed for all the stock except \$1000. The American Oil Exchange of Tu-

ACHES AND PAINS
SLOAN'S GETS 'EM!

Famous Pain and Ache Liniment, Kept Handy, Brings Gratifying Relief.

RHEUMATISM twinges ease up soon. So do stiff joints, back pain, neuralgia, overworked muscles, and those pains from weather exposure, because they don't fight long against the counter irritant Sloan's Liniment prescribes.

Keep this old family friend handy for instant relief. A little penetration without rubbing, leaving no sticky stains, num, or clogged pores. You ought to keep a bottle handy always. All druggists. Three sizes—30c, 75c, \$1.00.
